fredi cohen, artist and founder, archsculpt studio

Fredi Cohen, a new Industry Partner Member, is Artistic, Versatile and Practical. She creates very versatile artistic, practical solution for a variety of spaces, producing very flowing natural (feminine), almost lyrical artistic details as a correction to the straight (masculine) edges in most architecture.

Fredi embraces Feng Shui principles and masculine (practical, functional durable), and feminine (flowing forms and energy inspired by nature and sensual beauty) in a totally unique combination to achieve the optimal balance of form and function, and a safe, inspirational haven where one can recharge.

She is a widely acknowledged fine artist who now creates unique custom sculpted details for kitchens, baths and living spaces, including

sculpted sinks, backsplashes and countertops, tiles, enclosures for baths, showers, and Jacuzzis; sculpted fireplace surrounds, mantles, bedposts and headboards, art furniture, sculpted doors, grand entrances and one-of-a-kind sculpted lighting (including mixed media with stained glass in doors, headboards, sconces, etc.). A variety of materials and durable, beautiful, easy to maintain finishes are available in many natural stone-like surfaces and colors.

Fredi says, "My work is about providing the balanced, nurturing, recharging safe haven one needs to retreat to by correcting the straight edges in most architecture with more natural, feminine flowing, sensual energy, enhancing beauty everywhere. One can function at their best with that healthy balance and attitude both at home, and when facing life's challenges in the world."
